Founded in 2004, the **janinebeangallery** is a gallery for young contemporary art from Germany, Canada, South Korea and Italy. A close collaboration with our international artists is important and necessary to develop exhibitions and projects, all of which are curated by the curator Janine Bean. Out of this cooperation results often and ideally a reciprocal inspiration among the artists and the curator.

Regularly the gallery integrates guest artists in group exhibitions, insofar their works complement those of the artists of the janinebeangallery, respectively broaden the subject.

Along with one-time exhibition themes the gallery is organizing international exhibition-projects with various international artists. This is currently in particular the case for the exhibition-project called "Fairytale of Berlin".

Ongoing exhibitions and projects are accompanied thematically of single events inside the exhibition rooms. Artists of other categories let themselves be inspired of the surrounding works to feature their synaesthetically collages of sound, performances or readings.
